Relevant Experience

CWI Software sep 2020 - jan 2026

- I started as an intern on an intensive three-month course, where I learned some technologies and how to deal with the pressure of delivery dates
- Then I was allocated to the Arezzo&Co company, where I learned about agile processes, scrum, kanban and where I further developed my soft skills
- With the departure of another more experienced frontend from the squad, I took on more technical responsibilities and important decision-making regarding the evolution of the product

Relevant Courses

JustJavascript

- Dan Abramov course focused on understanding deeply the javascript universe
- **Understanding better:** Values & variables, Statements & expressions, Primitive types, Objects & functions, null & undefined, Properties & prototypes.

curso.dev

- Full stack javascript course by Filipe Deschamps, brings great business knowledge and soft skills
- An excellent technical foundation, explaining in depth DNS, other web protocols, automated tests, etc.
- The proposal is to create a project from scratch, based on the tabnews project, where it shows real problems that the project went through
- **Technologies:** Git & GitHub, JavaScript, Next.js, React, PostgreSQL, Automated Testing, Continuous Integration, Infrastructure as Code, And 35 other complementary modules and technologies

Education

Feevale University 2020 - 2024

- Bachelor of Technology - BTech, Computer Systems Analysis

Skills

- JavaScript and TypeScript
- React
- Next.js
- Java
- HTML, CSS, Sass and Styled-Components
- Git, Github and Azure
- Figma

Selected Projects

carmogui.dev

- Personal website that I developed with Next.js and React

deck lite

- Game made using Godot engine with godot script that I learned on my own
- Learned more about Object Oriented Programming
- Hands-on in project management
